IDENTIFICATION PROCEDURE – important information for completing the form

The recommended procedure for identification is described in the FEI booklet 'Identification of Horses'. The diagram and written description must agree and be sufficiently detailed (at least five identifying marks such as whorls or white markings) to ensure the positive identification of the animal in the future. White markings must be shown in RED and the written description completed using BLACK INK in BLOCK CAPITALS or TYPESCRIPT. If there are no white markings, this fact must be stated in the written description. All head and neck whorls should be marked ('X') and described in detail. Other whorls should be similarly recorded in grey and in animals lacking sufficient other distinguishing marks. Acquired marks ('V') and other distinguishing marks, such as prophet's thumb mark ('+'), walleye and so on, should always be noted. The Veterinary Surgeon must indicate the location of the microchip on the silhouette with a symbol.
