

How you can help prevent the spread of equine disease

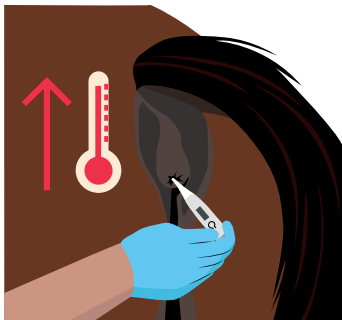

Vaccinate and keep
them up to date

Don't share water sources
away from the yard

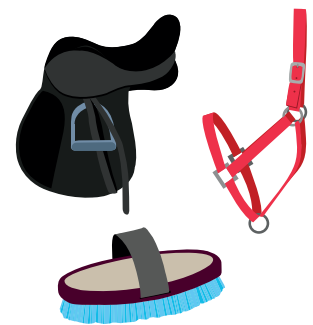

Prevent contact
off your yard

Increase in normal temperature
could indicate a horse isn't well

Unwell horses may not
show signs immediately

Provide each horse with
their own equipment

After visiting other yards, where
possible, disinfect boots, change
outer clothing and wash hands

Clean and disinfect equipment
and transport after events

If your horse is unwell,
isolate and call your vet

We're here to help
